Articles

Dr P. Abeles—Obituary **10**:34
An airport for Lubbock **3**:14
Andock's two-caisson gravity platform **1**:33
Around Japan in eighty days **1**:28
Assessment of in situ concrete and its application to HAC beams **3**:24
BAUMA—concrete plant at **8**:24
Beam column connections—reinforced concrete **3**:37
Beam—Folded plate roof, for Syrian University **9**:28
Beams (HAC) Assessment of in situ concrete and its application to **3**:24
Beams, Design of partially prestressed **9**:32
Birth of a Hovercraft **10**:16
Birth of a special **3**:20
Black Hawk—the story of a concrete Indian **3**:22
Boats—A creekfull of concrete **5**:19
Bridge—Investigating and recalculating a Hennebique **7**:14
Bridge pier—Engineered elegancy, story of a **12**:12
Building regulations—history, interpretation and enforcement **3**:27
Buxton Housing—Concrete masonry at **7**:19
The case for precast concrete floors in two-storey houses **5**:27
Caisson (two) at gravity platform—Andock **1**:33
A chance to meet the Davidsons **2**:20
A chance to meet Bryan Jefferson **7**:22
Children and concrete **9**:24
Chimney—Performance of a Monnoyer **6**:32
China—Delegation from **8**:20
Coating treatment for reinforcing steel **1**:31
Compressive strength of cubes, Influence of site curing on **2**:30
Computer—selling concrete by **6**:18
Concrete Bob's Hamilton houses **4**:28
A concrete form to shape a timber beam **12**:16
The concrete girdle forts at Chatham **11**:36
Concrete masonry at Buxton housing **7**:19
Concrete materials research seminar **10**:33
Concrete plant at Bauma 1977 **6**:24
Concrete ships **4**:23
Concrete and Sir Robert Smirke **4**:21
The Concrete Society Award 1977 **6**:37
The Concrete Society Silver Jubilee Award **10**:26
A consideration of the DIN flow table **12**:29
Construction towards 2000 **12**:18
Cottancin and Exeter Church **1**:24
Cracking and ultimate strength of wall corners **7**:31
A creekful of concrete boats **5**:19
Cricket pitches—concrete **2**:22
Cubes—Influence of site curing on compressive strength of **2**:30
Damping, Tensile stress effects on **3**:31
Deflection—What is permissible **2**:26
Demolition—What goes up **4**:14
Design of partially prestressed beams **9**:32
Deterioration of concrete in the Middle East, Influence of temperature on **8**:31
DIN flow table—A consideration of **12**:29
Early concrete roads in Edinburgh **9**:20
Education and training—A provocative look at **8**:28
Engineered elegance—The history of a bridge pier **12**:12
Eurocode **11**:41
Falsework at Kenfig **5**:30
Floors, precast concrete, in two-storey houses **5**:27
Floors—Unusual cellular raft to carry Wildfowl Trust complex **10**:29
Folded plate roof beam test for Syrian University **9**:28
Formwork, GRC and permanent **5**:20
Formwork Report—History of **12**:31
Formwork Report launched **5**:26
Formwork shutter—Birth of a special **3**:20
Foundations **6**:17
Fracture toughness **4**:20
French concrete tug **2**:25
From a world away **8**:20
A full pitch with concrete **2**:22
A future for concrete offshore structures **1**:21
Group members day **4**:35
German concrete equipment for UK **9**:34
German concrete prize **10**:32
Girdle forts—Concrete, at Chatham **11**:36
Phillip Gooding **2**:19
GRC and permanent formwork **5**:20
Hamilton houses—Concrete Bob's **4**:28
HAC beams, Assessment of in situ concrete and its application to **3**:24
Henthorne Scott—the house built by **8**:24
History of the Formwork Report **12**:31
Hong Kong's metro **2**:14
The house that Henthorne Scott built **8**:24
Hovercraft berth—Birth of a **10**:16
Indian (concrete)—Black Hawk—the story of **3**:22
Influence of site curing on the compressive strength of cubes **2**:30
Influence of temperature on deterioration of concrete in the Middle East **8**:31

In situ concrete—an assessment of and its application to HAC Beams **3**:24
Investigating and recalculating a Hennebique bridge **7**:14
Bryan Jefferson, A chance to meet **7**:32
Ken Jessop—You've got to go and go and go **9**:24
Kenfig Viaduct—Falsework at **5**:30
Oleg Kerensky looks back **4**:29
Lambot's boat **2**:24
Lower Lliw Dam, Past and present of the **5**:14
Lubbock, An airport for **3**:14
Masonry, concrete, at Buxton housing **7**:19
Materials Research Seminar, Concrete **11**:33
Middle East
Folded plate roof beam test for Syrian University **9**:28
Influence of temperature on deterioration of concrere in the **8**:31
Wish of Allah **6**:14
Mirfield Bridge—Investigating and recalculating a Hennebique bridge **7**:14
Mixes for London, Simple **10**:31
Mixes, Ultrasonic testing for fresh **12**:25
Monnoyer chimney, Performance of **6**:32
Nigeria—concrete and contrast **11**:18
Northampton's Presidential day **4**:22
Not quite concrete **6**:21
Offshore structure : Andoc's two-caisson gravity platform **1**:33
Offshore structures, A future for concrete **1**:21
Overseas Marketing Group—members day **4**:35
Past and present of the Lower Lliw Dam **5**:14
Performance of an old Monnoyer chimney **6**:32
Permanent formwork, GRC and **5**:20
Pipes, sewer, steel fibre reinforced concrete for **3**:16
Plas Dolydd—the house that Henthorne Scott built **8**:24
Plate, folded, roof beam—Test for Syrian University **9**:28
Pneumatic formation of reinforced concrete shells **4**:18
Prestressed, partially, beams—Design of **9**:23
Prestressing practice **3**:33
Pumping industry—the state of **9**:18
Quality, riding, of concrete roads **12**:21
Referendum results **7**:17
Reinforced concrete beam column connections **3**:37
Reinforced concrete shells, Pneumatic formation of **4**:18
Reinforced concrete (steel fibre) for sewer pipes **3**:16
Reinforcement—standardization of **11**:30
Reinforcing steel, Coating treatment for **1**:31
Renaissance for the Theatre Royal **10**:12
Research Seminar, Concrete materials **11**:33
Restoration of Tasman Bridge **11**:40
RIBA Awards feature concrete building **9**:23
Riding quality of concrete roads **12**:21
Roads, Early concrete, in Edinburgh **9**:30
Roads, Riding quality of concrete **12**:21
Roof beam test for Syrian University, Folded plate **9**:28
Safety—matter and mind **6**:31
Sainsbury's depot seven years later **8**:30
Schools—concrete and **9**:24
Sea tests for concrete spheres **12**:35
Seattle scene **9**:14
Selling concrete by computer **6**:18
The shape of things that went and came again **1**:14
Shells, reinforced concrete, Pneumatic formation of **4**:19
Ships, concrete **4**:23
Silver Leyswater Tower **3**:26
Simple mixes for London **10**:31
Sir Robert Smirke, Concrete and **4**:21
Site curing, Influence of, on the compressive strength of cubes **2**:30
Standardization of reinforcement **11**:30
State of the pumping industry **9**:18
Steel fibre reinforced concrete for sewer pipes **3**:16
Strength, ultimate, and cracking of wall corners **7**:31
St Sidwell's Methodist Church
Tasman Bridge, Restoration of **11**:40
Temperature—Influence of on the deterioration of concrete in the Middle East **8**:31
Tensile stress effects on damping **3**:31
Theatre Royal—Renaissance for **8**:12
Timber beam to shape a concrete form **12**:16
Training and education—A provocative look at **8**:28
Treatment, coating, for reinforcing steel **1**:31
The trouble with concrete **4**:25
Tug, French concrete **2**:25
Ultimate strength and cracking of wall corners **7**:31
Ultrasonic testing for fresh mixes **12**:25
Unusual cellular raft to carry Wildfowl Trust complex **10**:29
Viaduct in miniature **4**:32
Wall corners—Ultimate strength and cracking of **7**:31
Water tower in a rural setting **3**:26
Weathering Honours List **7**:26
What goes up **4**:14
What is permissible deflection **2**:26
Wish of Allah **6**:14
Wrought writing—right ? **10**:27
You've got to go and go and go says Ken Jessop **9**:24
